Nutrition, early *vs.* delayed enteral support effects on outcomes in severe burn injuries, 401

Occupational injuries
burn prevention knowledge in restaurants, 342
electrical, burn center role in prevention of, 132
major, burn, regional burn center treatment, 244
thermal burn fatalities in U.S., 305
Occupational therapist, educational preparedness in burn care, 66
OT/PT Forum
educational preparedness for therapists in burn care, 66
respiratory capacity decrease after burn/inhalation injury, 287
Watusi collar for neck burn contracture management, children, 220
Outcomes
burn questionnaire development, infants and young children, 196
burn-injured diabetic patients, 157
early tracheostomy effects on, in burn injuries, 431
Integra artificial skin effects on length of stay after major burn injury, 311
serious occupational burn injury treatment at regional burn center, 244
Oxidative stress, heat shock protein expression and, 103
Oxycodone, outpatient wound care, comparison with fentanyl citrate, children, 27

p38 mitogen-activated protein kinase, activation after burn injury, 172
Pain behavior, burned children, cartoon movie distraction effects, 60
Pain management
acutely burned children, 135
analgesia prescribing practices in emergency department burn patients, national study, 361
opioid analgesia, prn *vs.* regular scheduling of, pediatric burn patients, 424
posttraumatic stress disorder after burn injury and, 249
Parkland Formula, estimation of fluid resuscitation volume validity, 258
Patient satisfaction, telemedicine in follow-up burn care, 110
Peer consultation program, for burn inpatients, evaluation of, 449
Percutaneous decompression, abdominal compartment syndrome in thermal injury, comparison with decompressive laparotomy, 190
Perfusion, silicone gel sheets effects on, in hypertrophic burn scars, 208
Phonatory status, after burn/inhalation injury, long-term follow-up study, 235
Phosphorus, vitamin D effects on, pediatric burn patients, 416
Physical therapist, educational preparedness in burn care, 66
Posttraumatic stress disorder, regulation of, 249
Progenitor cells, thermal injury effects on myelopoiesis, 75
Proteolysis, in skeletal muscle after burn injury, insulin-like growth factor-1 inhibition of, 318
Pseudomonas aeruginosa infection, honey efficacy in inhibition of, in burns, 366
Psychological support, peer consultation program for burn inpatients, evaluation of, 449
Psychosocial Forum
burn camp staff training, 294
pain behavior, cartoon movie distraction effects, children, 60

pain management, acutely burned children, 135
quality of life after burn injury, 227
Psychosocial issues, posttraumatic stress disorder, management of, 249
Pulmonary arterial thermodilution, hemodynamic monitoring, comparison with transcardiopulmonary monitoring, 21
Pulmonary embolism, incidence in burn patients, 97

Quality of life
predictors of, after major burn injury, 229
sleep disturbance after burn injury, 32

Rehabilitation
burn camp, staff training, 294
exercise training effects on pulmonary function after thermal injury, children, 288
pain management, acutely burned children, 135
telemedicine in follow-up burn care and, 110
Restaurants, burn prevention knowledge in, 342
Resuscitation, fluid, Parkland Formula estimation of, 258

Scald injuries, occupational, treatment at regional burn center, 244
Scarring, neck burn contracture and, improved Watusi collar for management, children, 220
Scars, hypertrophic burn, silicone gel sheets effects on perfusion, 208
Sepsis
burn wound, burn nursing unit effects on, 281
gram-negative, core endotoxin immunization effects, route comparison study, 333
Silicone gel sheets, effects on perfusion, in hypertrophic burn scars, 208
Skin desquamation, toxic epidermal necrolysis, treatment at burn centers, multicenter review, 87
Skin grafts
cultured composite, differentiation and barrier formation, 126
exposed Achilles tendon, negative-pressure wound therapy treatment, case report, 167
healing of, vascular endothelial growth factor overexpression effects on, 10
thin split-thickness, harvesting techniques to cover Integra, editorial, 326
Sleep disturbance, after burn injury, 32
Stress response, after burn injuries, 172
Stroke volume index, transcardiopulmonary thermodilution role in monitoring, 21

Telemedicine, follow-up burn care and, 110
Thermal injuries
acute abdominal compartment syndrome in, percutaneous decompression *vs.* decompressive laparotomy for, 190
cecal perforation in, case report and literature review, 371
exercise training effects on pulmonary function, children, 288
fatalities, occupational, in U.S., 305
myelopoiesis effects, 75
Thermodilution, transcardiopulmonary *vs.* pulmonary arterial, hemodynamic monitoring in burn patients, 21
Thrombosis, deep venous
D-dimer level role in screening for, in burn patients, 439
incidence in burn patients, 97
Toxic epidermal necrolysis, treatment at burn centers, multicenter review, 87
Tracheostomy, early, effects on outcomes in burn injuries, 431
Transcardiopulmonary thermodilution, hemodynamic monitoring, comparison with pulmonary arterial thermodilution, 21
Tumor necrosis factor-á, activation after burn injury, 172

Vascular endothelial growth factor, overexpression, vascularization and skin substitute healing, 10
Vascular resistance index, transcardiopulmonary thermodilution role in monitoring, 21
Vascularization, vascular endothelial growth factor overexpression and, 10
Ventilation, Volume Diffusive Respirator *vs.* conventional, burned children, 444
Vitamin D, serum calcium, magnesium, and phosphorus effects, pediatric burn patients, 416

Watusi collar, improved, neck burn contracture management, children, 220
Workplace injury: *see* Occupational injuries
Wound care
nursing unit effects on wound infection, 281
outpatient, children, oral fentanyl citrate *vs.* oxycodone, 27
Wound healing, murine partial-thickness, heparin-binding epidermal growth factor-like growth factor production during, 116
Wound therapy, negative-pressure, exposed Achilles tendon treatment, case report, 167
